The Mulberry Medical Practice has approximately 5300 patients over 3 sites, the main site is at Sefton Avenue, the others at Burnt Oak and Stone grove, ie Woodcroft and Willow Court respectively. We have one residential home, a large population of white, Indian and Afrocaribbean patients. We look after one residential care Home close to Sefton Avenue. We also have a high level of elderly patients over the age of 65 years

The PRG was started in April 2012. GP Partners and receptionists were encouraged to ask patients to join. There was an advertisement on the digital board regarding this. Notes were also left with prescriptions. The Practice Liason officer Mrs Valerie Hembrow was asked to represent the and take minutes of meetings that were held.

The practice investigated options for creating a website and met with one website designer and electronically with two others to decide suitability and how best to meet the needs of the Practice on line and the Practice population. The partners felt that EMIS , would be the

best option.
